

McGRORYGLASS

OUR STORY

Founded in 1984 by John and Mary McGrory, McGrory Glass is family owned and operated to this day. We've expanded to four manufacturing and fabrication facilities spanning over 250,000 square feet in the last four decades, but we still function as a family unit. The McGrory team truly believes in working together for the greater good.

“Keep doing the little things right, and the milestones will take care of themselves.”

—John & Mary McGrory

MCGRORY GLASS GREEN

McGrory Glass is committed to the environment and sustainability. The 2.2 acre solar paneled roof of our main warehouse brought McGrory recognition as one of the first major glass fabrication companies to hit net zero energy consumption. But our commitment doesn't stop there. Recently, McGrory Glass [was awarded Green Fabricator of the Year](#) by USGlass Magazine.

MCGRORY GLASS SOLUTIONS

Navigate structural challenges, satisfy code requirements, and realize your design dreams with McGrory Glass. We offer comprehensive solutions across sectors — including our own in-house Print Division, a global leader in graphic and decorative film.
