Fire-Rated Glazing: Introductory Course

Course Number: *mcgrory071623*| **Provider ID:** *40107192* | **Credits:** *1 LU | HSW*

Course Description:

Creating light-filled and open environments contribute to the occupant's well-being and health, but there is also the issue of fire safety. This presentation will show how current fire-rated glazing solutions are addressing the demand for safer facilities.

Course Objectives:

☐ Identify current fire, impact and general life safety codes and standards related to glass.

☐ Show how fire-rated glass products protect people in the event of a fire, including the difference between "fire-protective" and "fire-resistive" classifications.

☐ Demonstrate how glass' translucency can create attractive, light-filled environments that contribute to occupants' health and comfort.

☐ Explore real-world fire-rated glazing solutions and learn how to solve common design problems.
